ABSTRACTED-PUB-NO: JP2004078259A

BASIC-ABSTRACT:

NOVELTY - A product use system (30) controls the processing for using the predetermined electronic product (80) which is acquired from the product server (20) based on the permission flag information (70) which shows the service condition of the product.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (1) use control method of the electronic product;
- (2) computer program for storing flag information of electronic product; and
- (3) merchandise **purchase** control system.

USE - For controlling the usage of digital image.

ADVANTAGE - The use limit intrinsic is imposed to each electronic product,

without applying an excessive burden to product server.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the electronic product provision system. (Drawing includes non-English language text).
